

STATE BANK OF INDIA

CENTRAL RECRUITMENT & PROMOTION DEPARTMENT CORPORATE CENTRE, MUMBAI (Phone: 022-2282 0427; Fax: 022-2282 0411; E-mail: crpd@sbi.co.in)

RECRUITMENT OF SPECIALIST CADRE OFFICERS IN STATE BANK OF INDIA ON REGULAR AND CONRTACTUAL BASIS ADVERTISEMENT No. CRPD/SCO/2023-24/001

1. Online Registration of Application and Online Payment of Fee: From 29.04.2023 To 19.05.2023

2. Date of Online Test (Tentative): In June 2023

3. Tentative Date of Downloading Call Letter for Online Test: 10 Days before exam

State Bank of India invites On-line application from Indian Citizen for appointment in the following Specialist Cadre Officer Posts on Regular and Contractual Basis. Candidates are requested to apply On-line through the link given in Bank's website https://bank.sbi/web/careers or https://www.sbi.co.in/web/careers

1. The process of Registration will be completed only when fee is deposited with the Bank through Online mode on or before the last date for payment of fee.

2. Before applying, candidates are requested to ensure that they fulfill the eligibility criteria for the post as on the date of eligibility.

3. Candidates are required to upload all required documents (brief resume, ID proof, age proof, educational qualification, experience etc.) failing which their candidature will not be considered for online written test/ interview.

4. Admission to online test will be purely provisional without verification of documents. Where shortlisting and interaction is the selection procedure, Shortlisting of applications will be provisional without verification of documents. Candidature will be subject to verification of all details/ documents with the original when a candidate reports for interview (if called).

5. In case a candidate is called for interview and is found not satisfying the eligibility criteria (Age, Educational Qualification and Experience etc.) he/ she will neither be allowed to appear for the interview nor be entitled for reimbursement of any travelling expenses.

6. Candidates are advised to check **Bank's website https://bank.sbi/web/careers or https://www.sbi.co.in/web/careers** regularly for details and updates (including the list of shortlisted/ qualified candidates). The Call letter for online Examination and "Acquaint Yourself Booklet" should be downloaded by entering registration number and password/date of birth from the Bank's website. Call letter for interview, where required, will be sent by e-mail only (**No hard copy will be sent**).

7. In case more than one candidate scores same marks at cut-off marks in the final merit list (common marks at cut-off point), such candidates will be ranked in the merit according to their age in descending order.

8. HARD COPY OF APPLICATION & OTHER DOCUMENTS NOT TO BE SENT TO THIS OFFICE.

9. All revision / corrigenda will be hosted only on the Bank's abovementioned websites.

10. A candidate can not apply for more than one post.

Essential Education Qualification or All Posts (as on 31.03.2023): BE/BTech in (Computer Science/ Computer Science & Engineering/ Information Technology/ Software Engineering/ Electronics & Communications Engineering or equivalent degree in relevant discipline) or MCA or MTech/MSc in (Computer Science/ Information Technology/ Electronic & Communications Engineering) from recognized University/ Institute.

6.	Deputy Manager (Java Developer)	Preferred Certification: Java Certification from Oracle	Minimum 5 years of post-basic qualification experience Software Development in IT, of which minimum 3 years' experience in Java / J2EE / Spring Technologies	 Knowledge of mobile application development technologies and web technologies like HTML5, Java, JavaScript, CSS, AJAX, Spring, Hibernate and native languages of various mobile operating systems Experience in project/program management. Building and Leading high-performing agile teams Focus on planning, development of strategies/initiatives Experience in delivering complex technology solutions within a defined Software development lifecycle Should have strong written, verbal and presentation skills Desirable: Experience in development of Android / i-OS Platform Experience in Cloud technology Working experience in DevSecOps environment
7.	Deputy Manager (Network Engineer)	Compulsory Certification: (Anyone of the below) CCNA /JNCIA-SEC/ JNCIS-SEC Check Point Certified Security Administrator (CCSA) R80.x PCCSA / PCNSA / PCNSE Certified McAfee Security Specialist Fortinet NSE 1 /NSE 2/ NSE 3	Minimum 5 years of post-basic qualification experience in IT, of which minimum 3 years ' experience Networking Domain.	 Should have expert level knowledge of IT Security, routing and switching protocol and networking devices. Experience on multiple environments and be comfortable with complex heterogeneous systems environments. Sound analytical and troubleshooting skills. Good team Management and co-ordination skills. Fluent in at least Hindi and English languages.
8.	Deputy Manager (CRM Developer)	Preferred: Certification on any CRM product not limited to Microsoft Dynamics, Salesforce CRM	Minimum 5 years of post-qualification experience in IT sector /Industry out of which 3 years' experience in CRM Development. Exp Desired in Banking/ IT sector/PSU Companies Preferred Experience : Demonstrated proficiency with Microsoft .NET 3.5+ development using C# Hands on experience on JavaScript, XML Development experience on global CRM product like CRMNEXT, Microsoft Dynamics, Salesforce CRM etc Experience with source control management systems and continuous integration/deployment environments Hands on experience on SOAP/REST based integration	CRM Development / CRM Technical Analyst having development experience
9.	Deputy Manager (Production Deployment & Support)		Minimum 5 years of post-qualification experience in IT sector /Industry out of which 3 years of experience in the field of production deployment. Preferred Experience : Working experience as software/product deployment engineer Hands on experience on IIS, WebLogic/WebSphere	
10.	Deputy Manager (Infrastructure Engineer)	 Preferred Certification: (Anyone of the below) CompTIA (ITF+, A+, Server +, Network +, Cloud +) CCNA, RHCE Microsoft Technology Associate (MTA), MCSE, MCSA (or any equivalent certification) 	 Minimum 5 years of post-basic qualification experience in IT, of which minimum 3 years' experience in core infrastructure Provisioning, Implementation & Operations Support. Experience on multiple environments and be comfortable with complex heterogeneous systems environments. 	 Developing and integrating solutions in cooperation with Infrastructure and Application project teams for solid infrastructure automation using existing industry standards, best practices and know-hows fitting it into existing infrastructure and operations framework Design, Plan & Execute projects using various technology solutions.
11.	Deputy Manager (Middleware Engineer)	Preferred Certification: Oracle WebLogic/ IBM Websphere/ JBoss/ RedHat Open Shift Container Platform or any equivalent certification.	Minimum 5 years of post-basic qualification experience in IT, of which minimum 3 years ' experience Application Server (Weblogic / JBoss / Apache Tomcat / WebSphere or any other related Application Server). Experience on multiple environments and be comfortable with complex heterogeneous systems environments. Experience in Middleware domain.	 Knowledge of multiple environments and be comfortable with complex heterogeneous systems environments. Must have good understanding on Application Server (Weblogic / JBoss / Apache Tomcat / WebSphere or any other applicable Application Server)
12.	Deputy Manager (Developer- OFSAA)	 Preferred Certifications: Oracle Data Integrator 12c Certified Implementation Specialist Oracle Business Intelligence Foundation Suite 11g Essential Oracle Data Integrator 12c Essential Oracle Database PL/SQL Certification 	5 years of experience in IT sector, preferably in implementation and maintenance of OFSAA in any organization.	 Overall knowledge of OFSAA modules. PL/SQL, Core Java, Shell Scripting, Data Modelling, Business Intelligence reporting, knowledge of Python, R, Big Data and relevant technologies
13.	Deputy Manager (Informatica/ ETL Developer)	Compulsory Qualification: Informatica PowerCenter	 Minimum 5 years of post-qualification experience in IT sector /Industry out of which minimum 3 years of experience in the field of Informatica development/ ETL development. Exp Desired in Banking/ IT sector/PSU Companies Preferred Experience: Working experience on Oracle 12C/19C Hands on experience on ETL tool preferably Informatica PowerCenter Hands on Experience on UNIX/Linux Shell Scripting Hands on experience on PL/SQL Strong Programming skills 	
14.	Deputy Manager (Treasury Support)	Preferred Certification: Diploma / Certification Course in Treasury, Investment and Risk Management from IIBF	Minimum 5 years of post-basic qualification experience out of which 3 years in Treasury Operations in a National / International Bank.	 Unix and Shell Scripting SQL /PL-SQL Oracle Sound Knowledge of Treasury software preferably in Finacle Treasury
15.	Deputy Manager (Microsoft Active Directory Services)	 Preferred Certification: Microsoft Identity and Access Administration Microsoft Azure Administrator Windows Server Administration Fundamentals (or any equivalent qualifications from Microsoft) 	Minimum 5 years post basic qualification experience in IT, out of which 2 years should be in Microsoft Related support in IT / PSB.	 Knowledge of Active Directory Domain Knowledge of Windows Server Administrator Knowledge of Active Directory Federation Services (ADFS)
16.	Deputy Manager (DevOps)	Preferred Certification: DEVOPS Certifications from a globally recognized / reputed institute or academy	Minimum 5 years of post-basic qualification experience in Software Development in IT, of which minimum 3 years ' experience of project management experience in successfully delivering complex technology solutions within a defined Software development lifecycle Building and Leading high-performing agile teams with focus on planning, development strategies/initiatives. Working experience in DevSecOps environment.	 Experience in project/program management. Building and Leading high-performing agile teams. Focus on planning, development of strategies/initiatives. Experience in delivering complex technology solutions within a defined Software development lifecycle. Should have strong written, verbal and presentation skills.
17.	Deputy Manager (Middleware Administrator WebLogic)		Minimum 5 years of post-basic qualification experience in related field in IT vertical of a reputed Organization out of which at least 3 years' experience in System/Server Administration	 Oracle WebLogic Server setup and administration. Oracle HTTP Server setup and administration. Proficiency in Unix/Linux preferably in RHEL. IIS Setup and Administration plus.
18.	Deputy Manager (System Administrator Linux)	Preferred Certification: Red Hat/ Oracle Linux Certification.	Minimum 5 years of post-basic qualification experience in related field in IT vertical of a reputed Organization out of which at least 3 years' experience in UNIX based System/Server Administration.	 Experience of UNIX based server/system administration. Experience in RHEL/Windows will be plus.
19.	Assistant Manager (Java Developer)	Preferred Certification: Java Certification from Oracle	Minimum 2 years of post-basic qualification software development experience in IT Industry/ Business.	Specific Skills (Preferred): • Core JAVA • JE22 Tecnologies • Springboot Framework • Hypernate

				 HTML5, JAVA Script, JQuery, CSS, Angular Restful API, SOAP, Postman Oracle Database, PL/SQL Additional Skills (Good to Have): Knowledge of Microservices RDBMS, Build tools (Jenkins, Maven, Git, etc.) Code Repository (GitHub, SVN etc.), and Web server like Tomcat etc.
20.	Assistant Manager (Full Stack Developer)	 Preferred Certification: Java Certification from Oracle Oracle Certified PL/SQL developer 	Minimum 2 years of post-basic qualification software development experience in IT Industry/ Business.	 Specific Skills (Preferred): Should be proficient in Java, Spring MVC / Spring Boot, Hibernate, Web- Services, Microservices, Angular JS, React JS, Java Script, PL/SQL, JSP, Servlet, HTML5.0, SVN, Jenkins Must have strong fundamentals on application design, architecture Additional Skills (Good to Have): Oracle Database, Unix/Linux, Kubernetes, Docker, Kafka
21.	Assistant Manager (.Net Developer)	Preferred Certification: .Dot Net Certification from Microsoft	Minimum 2 years of post-basic qualification software development experience in IT Industry/ Business.	Specific Skills (Preferred): .NET, C# / C/C++, Java Script Web Services / Groovy Script Oracle 19C, PL/SQL Linux Shell Scripting Kubernetes
22.	Assistant Manager (Angular Developer)	 Preferred Certification: Java Certification from Oracle 	Minimum 2 years of post-basic qualification software development experience in IT Industry/ Business.	 Specific Skills (Preferred): Angular.JSP JavaScript HTML JQuery CSS Must have strong fundamentals on application design, architecture.
23.	Assistant Manager (Software Developer)	 Preferred Certification: "Dot Net" Certification from Microsoft Java Certification from Oracle Oracle Certified Programmer (OCP)/Oracle Certified Associate (OCA) Certification Zend Certification from PHP Liferay Certified Professional Any other relevant Certifications 	Minimum 1 Year of post-basic work experience in Software Development/ in the field of Information Technology.	 Specific Skills (Good to have): Knowledge of .Net MVC, .NET Core. Knowledge of JAVA/Advanced JAVA Angular REST APIs. Knowledge of PL/SQL Sound analytical, troubleshooting and programming skills are desired.
24.	Assistant Manager (Endpoint Security Support)	 Preferred Certification: Certified Ethical Hacker (CEH) Endpoint Security Certification of any OEM like TrendMicro ApexOne Certified Professional or TrendMlcro Deep Security Certified Professional 	Minimum 2 years post basic qualification experience in End Point Security Solutions in IT sector/ IT industry.	Experience in Anti-Virus, Anti-Malware, patching, EDR solution etc.
25.	Assistant Manager (Developer - OFSAA)	 Preferred Certification: Oracle Data Integrator 12c Certified Implementation Specialist Oracle Business Intelligence Foundation Suite 11g Essential Oracle Data Integrator 12c Essential Oracle Database PL/SQL Certification 	2 years of experience in IT sector preferably in implementation and maintenance of OFSAA in any organization.	PL/SQL, Core Java, Shell Scripting, Data Modelling, Business Intelligence reporting, knowledge of Python, R, Big Data and relevant technologies
26.	Assistant Manager (Microsoft Active Directory Services)	 Preferred Certification: Microsoft Identity and Access Administration Microsoft Azure Administrator Windows Server Administration Fundamentals {or any equivalent qualification(s) from Microsoft} 	Minimum 2 years post basic qualification experience in Microsoft Related Support in IT Field.	 Specific Skills (Preferred): Knowledge of Active Directory Domain Knowledge of Windows Server Administrator Knowledge of Active Directory Federation Services (ADFS)
27.	Assistant Manager (IIB Developer)	Compulsory Certification: IBM Certified Solution Developer - Integration Bus v10.0	 Minimum 2 years of post-qualification experience in IT sector /Industry on IIB Development/ as IIB Developer. Exp Desired in Banking/ IT sector/PSU Companies Preferred Experience: Hands on experience on IBM Integration Bus Version 10 Having good experience in developing Web services in IIB (Message Broker) and Message Broker (Both REST & SOAP Based) Experienced in implementing SOA architecture using IBM WMB/WMQ and DataPower. Strong programming Knowledge of Esql, Java, XSLT Mapping. Well versed with XML related technologies like XML Schema, XPath and XSL. Experience in Architecture principles, System Integration, Technical sizing, High availability aspects, Integration best practices Minimum 2 years of post-qualification experience in IT sector /Industry on DR automation/ application /infrastructure monitoring tools. Exp Desired in Banking/ IT sector/PSU Companies Preferred Experience: Working experience on BMC Truesight Operations Management, Truesight Server Automation, Entuity, Truesight Network Automation, Truesight Smart Reporting Strong knowledge of RedHat Linux and Windows Operating System Hands on experience on tools implementation, troubleshooting, configuration, integration, upgrades of DR automation tools preferably SANOVI Strong experience with TrueSight Operations Management, Patrol Central Administration, RT server and Patrol Agent and all Knowledge modules Experience in Design and implementation of integration solution for performance and event management using BPPM notification and enrichment policies for various types of customizations Hands-on Experience in configuring and designing reports using Smart Reporting Experience in Configuring events using MRL/BAROC as per requirement Experience in Configuring events using MRL/BAROC as per requirement 	Specific Skille (Desferred):
29.	Assistant Manager (Android Developer)	 Preferred Certification: Java Certification from Oracle Any certification in Kony Development Oracle Certified PL/SQL developer 	Minimum 2 years of post-basic qualification software development experience in IT Industry/ Business.	 Specific Skills (Preferred): Should be proficient in Android Native Development Must have strong fundamentals on application design, architecture Additional Skills (Good to Have): Kony MADP, Apache Cordova, Flutter Google Certified Android Developer Oracle Database, Unix/Linux, Kubernetes, Docker, Kafka

30.	Assistant Manager (iOS Developer)	 Preferred Certification: Any certification in SWIFT Any certification in iOS Development Any certification in Kony Development Oracle Certified PL/SQL developer 	Minimum 2 years of post-basic qualification experience in IT Industry/ Business.		 Must have stron Additional Skills (G Kony MADP, Ap Oracle Database 	sient in iOS native development g fundamentals on application design, architecture bood to Have) : bache Cordova, Flutter e, Unix/Linux, Kubernetes, Docker, Kafka
31.	Assistant Manager (PI/Sql Developer)	Preferred Certification: Oracle Certified PL/SQL Developer.	Minimum 2 years of relevant experienc and Support projects related to Oracle Applications.	PL/SQL based Enterprise Experience with Oracle function Hands on deve		ferred): Oracle Version 10g, 11g, 12c and higher. s, procedures, triggers, packages & performance tuning. opment using Oracle PL/SQL. ata Sharding concepts.
32.	Assistant Manager (Platform Engineer)	 Preferred Certification: Java Certification from Oracle 	Minimum 2 years of post-basic qualification experience in IT Industry/ Business.	ation software development	Specific Skills (Pref Platform knowle Containerization Linux / RHEL Spring Cloud Message Queue	ferred): dge on Kubernates,Docker or any other platform.
33.	Assistant Manager (Devops Admin)	 Preferred Certification: Java Certification from Oracle DevOps Certification from any recognized Institute. 	Minimum 2 years of post-basic qualification experience in IT Industry/ Business.	ation software development	 Specific Skills (Pref Dev Ops Admin Must have stron 	ferred): (Jenkins, Nexus, Ansible) g fundamentals on application design, architecture.
POST NO.	POST	OTHER PREFERRED/ COMPULSORY QUALIFICATION/CERTFICATION (AS ON 31.03.2023)	POST QUALIFICATION WORK EXPERIENCE (\$) (AS ON 31.03.2023)	SPECIFIC SKILLS (PREFERRED):		
34.	Assistant VP (Technology Architect)	MBA as an additional qualification is preferred	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector. 	 Skills in identifying enterprise derive system specifications, into manageable parts. Skills on more than one deve stack required preferably C++ or other open-source technol Expertise in Java technologie technologies and middleware Knowledge of cross platform development – IBM MEA / Kc Skills on various operating sy LINUX, Windows. Hands on experience in deve applications including web se message queue, service oriel services architecture. Skills on Private Cloud setup cloud (such as Azure/AWS efficiency of the second for th	breaking down them lopment technology +, Java, .NET, PHP ogies. s or .NET technologies. Mobile application ony etc. stems like AIX, lopment of rvices, web APIs, nted and micro (VMware) and public tc.) of Infrastructure and se applications. ability of Architecting	 In-depth knowledge of enterprise systems, modules, and software integration. Expertise in migration of legacy applications from on-premise to cloud/hybrid environments. Should have experience in any NOSQL database and RDBMS preferably on Oracle database. Knowledge of new and upcoming front end technologies. Successful introduction of new technology, made design decisions for a product and lived with the consequences of the decisions. Strong proponent of engineering best practices for Unit Testing, Coverage, Code Quality, Continuous Integration & Continuous Deployment. Ability to handle conflict and build consensus around different approaches among stakeholders. Superior oral and written communication skills. Must be able to communicate complex ideas clearly to a variety of audiences.
35.	Assistant VP (DevOps Architect)			 Scalable Saas based platform Strong knowledge of DevOps (CI/CD Toolchain like Jenkins Ansible, SonarCube, HPfortift Kibana etc) Working knowledge of Autom provisioning and middleware Expertise in container orches Tanzu , OpenShift etc., to dep applications in containers. DevSecOps Architect on any Expert/Professional level Cer field preferred. Expertise in end-to-end DevC implementation. 	Platform tooling s, Maven, GitLab, y, Jmeter, Nagios, nation service configuration tration such as ploy and manage v cloud or platform. tification in DevOps	 Skills in defining & developing DevOps framework on Private, Public, Hybrid Cloud platform along with designing, developing, and implementing software integrations. Expertise in provisioning of infrastructure through Infrastructure as Code (IAC) Working knowledge of DevOps monitoring tools and Scripting (shell, python, ruby, groovy etc.) skills for automating day-today work Familiarity with agile software development methodologies . Skills with RHEL and Windows Operating System. Should have ability to interact with stakeholder departments and ensure migration to DevOps platform and troubleshoot issues
36.	Assistant VP (API Architect) Assistant VP (Infrastructure Architect)	MBA as an additional qualification is preferred MBA as an additional qualification is preferred	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector. Preferred Experience: 3 years on API Architecture. Career growth from developer to designing and architecting API platforms i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector. 	 Exposure to application integ Architecture, and private Clouk knowledge of public Cloud – . Knowledge of integration prod IBM Gateway, API Gateways Ability to connect dots, conce API architecture from strategi perspective. Is infra components Network and arrive ous infra platforms assessing business t, infra resource rk. tructure platforms	 Strong engineering skills and enterprise architecture data skills. Exposure to application integrations, API microservices architecture. Strong negotiation skills - design considerations, tools selection, technology conviction, prioritization of features, meeting delivery timelines, influencing business stakeholders, challenging teams. Expertise in designing and implementing API based platforms and architecture for similar scale and domain organizations. and new technologies and ability to apply trends to architectural needs Knowledge of infrastructure elements and requirements related to infra virtualization, Software-defined Infrastructure, Private/Public cloud / container platforms. Skills in Infrastructure implementation, integration, migration and infra management tools.
38.	Assistant VP (Program Manager) Assistant VP (Application Architect)	MBA as an additional qualification is preferred Compulsory Certification: (Anyone of the below) • Project Management PMP certification • Agile – Scrum Master Certification MBA as an additional qualification is preferred	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in IT Program Manager functions in large projects, preferably in Banking / Financial Sector. Preferred Experience: Experience with Project Portfolio / Program Management functions i. Minimum 12 years' post basic qualification experience in IT field. 	 (On-premise / Cloud / Hybrid) Skills in infra design of Data of migration and Managment. Ability to write architecture / of and review design documents teams Knowledge and understandin Skilled at driving teams to acl process compliance, capabilit security controls and busines Skills in project management Agile, Lean etc. Expertise in managing multip projects and ability to work in established goals. Expertise in Executive level m monitoring & periodic reportir Ability to create, evaluate refer and ensure enterprise wide b adherence, and compliance. 	centers, connectivity, lesign documents s provided by Project g of industry trends. nieve regulatory / ty management, s-IT alignment methodologies like le concurrent dependently towards eporting, project ig, handling erence architectures	 Ability to identify and resolve performance issues and bottlenecks. Expert level OEM certifications on Infrastructure (Compute/Storage/Network) preferred. Sharp technical skills to solve issues. Strong communication and presentation skills. dependencies, providing recommendations on project alignment, scope and provide recommendations to management. Skills in Risk management on timely identification of risks, proposing risk-mitigation strategies and act proactive risk mitigation. Expertise in Project planning (High-level to granular level), milestone estimation, assigning roles and skills as per requirements Knowledge of cross platform Mobile application development – IBM MEA / Kony etc. Expertise in modern user interface frameworks.

Page ${\bf 5}$ of ${\bf 14}$

			ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector.	Expertise in Java technologies or .NET technologies and middleware technologies.	 Expertise on various operating systems like AIX, LINUX, Windows. Ability to train teams and prepare presentations.
40.	Assistant VP (Security Architect)	 MBA as an additional qualification is preferred. Compulsory Certification: (Anyone of the below) CISA / CISSP/ SSCP / CISM 	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in the role of Security Architect in an organization in financial services industry. 	 Expertise in architecting secure end-to-end security solutions and controls to protect Digital Applications (on-premise, cloud and hybrid applications) and IT assets of the enterprise. Having skills in defining and implementing cloud security and best practices Skills and knowledge of IT security standards and frameworks (such as MITRE, COBIT, CISA, ISA , 	 ISO 27001/2,ISO 31000, NIST 800, ISO 17799 etc.) Thorough understanding of private / public cloud architectures and deployment models. Thorough understanding of Data leakage prevention techniques and tools Skills with desktop security, application security and security vulnerability analysis
41.	Assistant VP (Data Architect)	MBA as an additional qualification is preferred	i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector.	 In depth knowledge of data reconciliation, storage (capacity planning), lineage using different tools Having skills in migration of logical DWH from one stack to another. 	 Knowledge and experience in IBM stack will be preferred. Additional knowledge of other stacks like Teradata/SAP/Oracle stack etc will be nice to have. Knowledge of reporting tools like IBM Cognos, Tableau, Power BI etc.
42.	Assistant VP (Cloud Architect)	 MBA as an additional qualification is preferred Preferred Certification: Expert/Professional level Certification on at least one public cloud provider (AWS/Azure/GCP). 	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in Cloud architectural functions, preferably in Banking / Financial Sector. 	 In-depth experience in Secure Solutions architecture for Cloud platforms (Private / Public / Hybrid). Knowledge and experience of implementation with container platforms like Tanzu / Openshift etc. Expertise in migration of applications from Physical infrastructure to cloud infrastructure. Expertise in reviewing implementation to ensure design alignment of Digital solutions to globally defined enterprise architecture policies, patterns, blueprints and frameworks. 	 Supporting security architecture review of cloud infrastructure designs Good understanding of pricing models in the cloud and should have experience in cost-benefit analysis. Ability to provide technical input and know-how to architecture governance processes for private Cloud – VMWare and knowledge of public Cloud – Azure/AWS etc. Ability to review changes made by Private/Public Cloud providers to understand the impact on Digital platforms/services
43.	Assistant VP (Integration Architect)	MBA as an additional qualification is preferred	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector. 	 In-depth knowledge of enterprise systems, modules and software integration. Provide technical leadership to design and implement solutions through thoughtful use of modern technology. Skills with REST based APIs, Microservices and leveraging open-source technologies for developing service-based architecture. Hands on ability to create Proof of Concepts for 	 team, in order to demonstrate the ideas and start the development processes Hands on experience with middleware products like IBM IIB, IBM MQ, Kafka etc. including ability to handle optimal configurations to meet performance requirements. Knowledge of DevOps tools like Jira, Confluence, Junit etc. Sharp technical skills to solve issues. Strong communication and presentation skills.
44.	Assistant VP (Performance Architect)	MBA as an additional qualification is preferred	 i. Minimum 12 years' post basic qualification experience in IT field. ii. Out of 12 years' experience, minimum 5 years' must be in relevant architectural functions, preferably in Banking / Financial Sector. iii. Experience in BFSI domain or other similar domains with complex business requirements is preferred. 	 Ability to define and document performance goals such as KPIs /SLAs. Creating a framework for measuring and validating the goals. Expertise in building Full Stack applications with focus on performance and low latency. Ability to debug and profile Web/Mobile applications with Chrome DevTools or Native profilers Good understanding of Networking fundamentals, OSI Stack, DNS, TCP protocols, Browser rendering and various stages of execution 	 Strong understanding of Distributed Systems, Fault Tolerance and Resiliency. Exposure to Domain Driven Design (DDD), SOLID principles and Data Modelling on various RDBMS, NoSQL databases. Expertise on working with microservices, API servers, databases, cloud native development, observability, alerting and monitoring systems. Sharp technical skills to solve issues across dependent applications. Strong communication and presentation skills.
45.	Senior Special Executive (Middleware Architect)	 Preferred Certification: IBM Certified Solution Developer - Integration Bus v10.0. Oracle Service Bus 12c: System Admin, Design Integrate Accel 	Minimum 8 years post basic qualification experience in IT, out of which 5 years should be in Lead development, implementation, and maintenance of ESB in a Bank/ IT Organisation. Preferred Experience : Experience in Architect, implement and designing of middleware/ESB with IBM Integration Bus.	 Well versed in - SOA Governance & Best Practices - for SOAP/REST Web Service development, Managing business asset such as XSD's, WSDL, Process Definitions, XSLT etc, Design time UDDI, Policy management. Good knowledge of DNS, Firewall, HW Loadbalancer, Keep Alive, Sticky sessions. Should be able to work withAPI gateways, API management tools like IBM Datapower, IBM API Connect. Good knowledge of API security standards and best practices. 	 Good understanding of IBM message Queues, creating queues, managing queues and queue depths. Good knowledge of performance tuning and optimisation tools and techniques. Hands-on experience with release management process in SOA, ESB environment. Sound knowledge of networking and OS (RHEL), brokers, Cache. Hands-on experience on high availability and high scalability design and implementations.
46.	Senior Executive (API Designer)	 Preferred Certification: IBM Certified Solution Developer - Integration Bus v10.0 	Minimum 5 years post basic qualification experience of Development and Designing of APIs in Banks/ IT Organisation. Preferred Experience: Development of RESTful JSON based APIs in IBM Integration Bus	 Capable of working on IBM Integration Bus, IBM Datapower platform, API design & development on IIB, SOA Architecture and ESB applications. Well-versed in REST fundamentals and API design best practices Strong knowledge in Web services and API technologies (REST, JSON, XML), API governance, API management, CI/CD Knowledge of securing APIs (SSL Certificates, Keystores, Authentication Methods, -(Basic, OAuth), Cryptography) Capable of working in a CI/CD environment and familiar with DevOps principles (MS TFS, Jenkins). Proficiency in API testing tools such as Postman, SOAP UI, or Insomnia. 	 Proficiency in understanding data flow & sequence diagrams Designing and developing with web services and exposure to API led connectivity methodology. Familiarity with API Patterns and design including decomposition into reusable components, design flows, error mechanism, validation frameworks, reusability. Familiar with agile delivery environment Good understanding of Design Specs, API Specs, HLD/LLD and Test Specifications. Well versed with design patterns and methodology. Familiar with GDPR, Open banking and Data Security measures
47.	Senior Executive (API Developer)			 Capable of design and development on IBM Integration Bus, IBM Datapower platform, API design & development on IIB, SOA Architecture and ESB applications. Capable of developing API using IIB(ESQL), Java, Python, Springboot, REST, JSON, PostMan, SOAPUI, Swaggers. Expertise in API Gateways, API Caching, and application servers on public cloud systems like AWS/Azure. 	 Capable of designing web based JSON APIs with industry specific security measures specifically symmetric and asymmetric cryptography, channel encryption, JSON encryption and algorithms. Working knowledge of CI/CD, Agile, DevOps methodologies and tools like Jira, Confluence, Jenkins, Git Lab. Good understanding of validation frameworks. Familiar with Secure Coding Practices and procedures.
48.	Senior Executive (API Performance Tester)	 Preferred Certification: ISTQB / CAST / CSTE / ALST 	 Minimum 5 years post basic qualification experience in Performance and regression testing of APIs/applications in a Bank / IT Organisation. Preferred Experience: Experience in Performance testing, regression testing, Stress testing, endurance testing, spike testing and volume testing. 	 Performance and Regression testing especially Restful APIs. Capable of Performance testing, Load testing, Regression testing of Restful APIs. Well versed with Performance, Regression testing tools and utilities like Jmeter, HP Performance tester, WebLOAD, LoadNinja, Silk Performer or Rational Performance Tester. Sound knowledge of designing and developing test suites and test cases. Expertise in Automation testing, Testing tools and utilities. Should be able to create data set and test data. 	 Capable of Validating the response, response time, error code of APIs and process flows Able to read and understand the API documentations. Good knowledge of use cases and flow diagram. Should be good in SQL queries to validate API and DB data elements. Good understanding of Stress testing, Endurance testing, Spike testing, Volume testing. Good knowledge of Non-Relational DB like MongoDB, Apache Cassandra.

49.	Senior Executive (Dev-Sec-Ops- Developer) Senior Executive (API Security Architect)	 Compulsory Certification: (Anyone of the below) Microsoft Azure DevOps Engineer Expert AWS Certified DevOps Engineer Certification Preferred Certification: Docker Certified Associate Certification Kubernetes Administrator Certification CISA certification: (Anyone of the below) CISA / CISSP / SSCP / CEH / CISM Preferred Certification: API Security certification by API Academy OWASP Certification 	Minimum 5 years post basic qualification experience in DevOps Implementation and CI / CD in a Bank / IT Organisation. Preferred Experience : Hands-on experience on Docker/Kubernetes Minimum 5 years post qualification experience in IT, out of which 2 years should be in information security and cyber security including analysing, auditing, investigating security aspects in applications and APIs in a Bank/ IT Organisation.	 Capable of working in source control and version control tools like MS TFS, Jenkins. Sound knowledge of Continuous Integration and Continuous Development methodologies and tools. Sound knowledge of Configuration Management tools and techniques. Well versed with Deployment Automation using TFS / Jenkins / team city. Capablility ofdesigning and implementing security solutions; monitoring and improving those solutions while working with an information security team. Should have capability of consulting & engineering in the design and development of security best practices; implementation of security measures to meet business goals, customer needs and regulatory requirements. Good knowledge of Security considerations of cloud computing, including data breaches, hacking, account hijacking, malicious insiders, third parties, authentication, APTs, data loss and DoS attacks Knowledge of containerization of APIs using containerization and continuous Development and continuous Development and tools. Capable of developing scripts and configuration for automation of build deployments, build creation, code checking and automated testing execution. Should have capability of consulting & engineering in the design and development of security best practices; implementation of security methodologies, authentication technologies and security standards and protocols including ISO27001, Risk assessment procedures, policy formation, role-based authorization methodologies. Good knowledge of IT and Data Protection Acts
51.	Senior Executive (Microsoft Active Directory Services)	 Preferred Certification: Microsoft Identity and Access Administration Microsoft Azure Administrator Windows Server Administration Fundamentals {or any equivalent qualification(s) from Microsoft} 	Minimum 5 years post basic qualification experience in IT, out of which 2 years should be in Microsoft Related support in IT / PSB.	Good knowledge of Identity and access And GDPR guidelines. Knowledge of Active Directory Domain Knowledge of Windows Server Administrator Services (ADFS)
52.	Senior Executive (Endpoint Security Support)	 Preferred Certification: Certified Ethical Hacker (CEH) Endpoint Security Certification of any OEM like TrendMicro ApexOne Certified Professional or TrendMlcro Deep Security Certified Professional 	Minimum 5 years post basic qualification experience in IT, out of which 2 years should be in End Point Security in IT / PSB.	Experience in Anti-Virus, Anti-Malware, patching, EDR solution etc.
	Profile & KRAs	Detail des miniformet des Durche Deta De		
No.	Post Manager	Detail description of Job Profile, Role, Res	sponsibilities, and Functions	 Work in an Agile (scrum) and fast-paced environment where he/she will need to work closely
	(Development Lead)	 delivery. Provide technical leadership on Industry of Enterprise Apps. Share functional requirements and lead Provide solutions to technical issues and and ensuring the delivered solution mee Skills development of technical support s Will be responsible for resolution of any additional support from SMEs of the SI of Steer a team of developers towards a condevelopment. 	nd review deliverables to ensure highest stan standard best practices for Security and Perf the technical planning, designing, coding, and d are responsible for meeting development sc ts the technical specifications and design requ staff. technical issues relating to the solution offere or the product vendor.	 Will need to think creatively to deliver technical designs for any enhancements or changes required or recommended. Infrastructure Lead should ensure platform availability, Capacity management and IT Services Continuity. He / she will also be responsible for configuration, change & release management, incident & problem management. Development Lead will be responsible for code review, delivering code enhancements, managing the development process, QA and review of test cases. Ability to pick up new technologies quickly and efficiently. Analyse potential impact of problem resolution and take corrective measures when needed. Root Cause Analysis.
	Manager (Infra Architect)	 system integration and implementation s Oversee all aspects of project design, fra and implementation phases for projects Define and design technology solutions Performs solution definition of a problem Provide technical leadership on Industry of Enterprise Apps and to ensure highes Translate business requirements to tech Evaluate technologies with respect to the 	om initial kick-off through requirement analysi within the solution area. to assist Bank in meeting their business object a domain. standard best practices for Security and Perf it standard of delivery. nical solution.	 met whilst also ensure that service qualities (Performance, scalability, extensibility etc) for now and for the future are achievable. Strong design experience and technical knowledge. Will be responsible for resolution of any technical issues relating to the solution offered, drawing additional support from SMEs of the SI or the product vendor. Analyse potential impact of problem resolution and take corrective measures when needed & plan for preventive measures. Design tools Expertise (Rational, Enterprise Architect etc.) Project Evaluations, Root Cause Analysis
	Deputy Manager (Database Administrator)	 database on windows and NonWindows Monitor the Database health and ensurine Responsibilities: Installation, Configuration, Patching and Windows servers. Implementing TDE, Data Redaction, Charkey store management etc. Database Architecture and Design. Database Performance Tuning and Que Day to day database operations & support Setup and maintain Oracle RAC, Golder Integrate the database with Oracle OEM time to time. Provide Inputs/Evidence for Database Raudit and security points. Coordinating with Application owner, Se Train the team members in DB Administ Functions / Activities: Patch implementation, Database Version 	ng Availability of the database. upgradation of Oracle database in Windows annel Encryption and Integrity Checksum, DB ny Tuning. ort, backup restoration testing and monitoring. Gate, Oracle Data Guard, DG Broker. For any other monitoring tools as specified by eview, Security Review and closure of databa curity and Risk teams to resolve the vulnerabi	 Manage and Monitor the database server's health and implement best security practices to secure the database. Setup and maintain Oracle NOSQL database, Oracle Sharding, Golden Gate replication. Cluster Configurations (RAC, Active-passive clustering) w.r.t database Setup of Oracle In-Memory Database features. Configuring DR (Standby's) databases, maintaining data guard / log shipping configurations Liaisons with various in house and / or third-party teams and ensure achieving the committed service levels objectives Trouble shooting, purging, archiving, back-up, re-organization of database, performance tuning etc. Learn other database technologies as decided by the Bank Perform day-to day Administration and management of Non-Oracle Databases as decided by the Bank Perform additional duties as determined by business needs and as directed by management Transfer data from existing system to new platform / data migration. Data Extraction, Transformation, and Loading: Efficiently importing large volumes of data that have been extracted from multiple systems into a data warehouse environment. Specialized Data Handling: Managing a very large database (VLDB) may require higher-level skills and additional monitoring and tuning to maintain efficiency. DC/DR server configuration setup, maintenance, and capacity planning.
	Deputy Manager (IT Treasury)	Responsibilities: • Techno-functional support to Treasury C • Configuration of new products in Murex I • Testing. • Application upgrade activities. • Knowledge about VaR and MLC, NOOP • Co-ordination with Murex application tea • Knowledge of Domestic and Internationa • Knowledge of various treasury products,	Application. m. al Treasury Operation.	 Day to day operation of Murex Application and functional knowledge of its various modules. Monitoring of VaR and MLC reports. Effective evaluation of it requirements of new projects to facilitate their timely execution. Resolving issues related to treasury operation. Co-ordination with other interfaces with Murex application. Performing UAT exercise for testing of Reports. Back testing, Stress Testing and VAR and Evar reports generation for MRMD & IBG. Manage integration of new applications with Core Banking and other channels. Product Configuration in Murex. Development of new requirements around Murex applications.
	Deputy Manager (Software Developer)	Roles & Responsibilities: • Application Development for various Bus	siness Demands using latest development teo , Maintenance, Quality Assurance, Debugging	 Preparation of detailed Solution Design. Coding of the proposed solution,

	r		
		 Functions / Activities: Develop solutions designed to maximize Business Value. 	 Conducting Business Requirement Analysis Deployment of the developed software / application.
		Able to rapidly acquire knowledge of a given domain.	Handling the Production Bugs and providing support.
		 Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Documentation. Continually learn and keep abreast with latest technologies.
		Communicate efficiently and purposefully with internal customers and business partners.	 Perform additional duties as determined by business needs and as directed by management.
6.	Deputy Manager (Java Developer)	 Design and implement application solutions using device native API's and application frameworks. 	 with the business and respond to changing priorities. Generation of dashboards / reports to measure / monitor availability, performance and business
	(Java Developer)	 Design and implement high performance server side application solutions for the target domain. 	 Generation of dashboards / reports to measure / monitor availability, penormance and business volumes.
		Develop integration solutions between the product server side components and enterprise	Will be responsible for L3 support for any technical issues relating to platform.
		 systems. Ability to handle multiple tasks, prioritize and meet deadlines. 	 Document the various modules for delivery of technical / user manuals. Perform peer level code review, prepare test cases and perform unit testing.
		 Participate in the full life-cycle development process from product definition, through design, 	 Work in a fast paced, cross-functional and multi departmental environment.
		development, test, release and maintenance.	 Functional go-to person for multiple business partners.
7.	Deputy Manager	 Work in an Agile (scrum) and fast-paced environment where he/she will need to work closely To have 24 * 7 involvement over Network activities in a shift basis for better supervision and 	 Deliver products/services in alignment with business needs and objectives. Manage logs, backups and tape inventory.
1.	(Network	governance.	 Escalating hardware and system-level problems to AMC Vendors.
	Èngineer)	Installation, configuration and patching activities.	Working on the requests of development and support team on staging and UAT setup
		 Monitor operating system utilization patterns and preparing reports. Ensuring consistency across staging/production and Disaster recovery systems. 	 Hardening of devices as per bank policy User administration of all servers
		 Monitoring Network devices for hardware errors like hard disk, RAM, CPU failures/warnings and 	Performance improvement and automation of jobs
		notifying appropriate service providers and working on the same till closure.	Above activities in all environments of application (production, DR, development, and staging).
8.	Deputy Manager (CRM Developer)	 Understand the existing CRM system and identify any gaps or shortcomings and design the most plausible and cost-effective solutions to overcome the existing CRM system's 	 Coordinating with departments to ensure delivery. Integrate existing CRM with new proposed software of banks.
		shortcomings	 Meeting business units to understand their process requirements
		Developing code for custom plugins, add-on solutions	Configuration and customization in banks CRM Application as per business unit requirement
		 Configuration and customization in banks CRM Application as per business unit requirement Perform unit testing, SIT to ensure CRM solutions are robust, efficient, bug-free, and meet the 	 Documentation of the technical specifications and configurations involved in the CRM solution Building customized dashboards that showcase real-time data from the CRM system.
		clients' requirements.	
9.	Deputy Manager	Recommend process improvements to ensure system scalability and reliability.	Ensure the integrity and consistency of backup services.
	(Production Deployment &	 Assist in developing and implementation of deployment plan. Analyse and troubleshoot deployment issues in a timely manner. 	 Periodically test disaster recovery processes. Develop and run load and automated testing of online services.
	Support)	 Act as primary contact for deployment related inquiries and issues. 	Resolve production related issues.
		 Deploy software and related updates for production, testing and development. 	Extract and provide the data from database as per business unit requirement.
		 Promptly resolve any hosting or deployment related issues in production services. Design, develop and modify automated deployment, monitoring, backup, and recovery systems. 	Participate the in IBCE/ DR Drills
10	Deputy Manager	Installation, configuration and patching activities.	Escalating hardware and system-level problems to AMC Partners.
	(Infrastructure	 Monitor operating system utilization patterns and preparing reports. 	 Working on the requests of development and support team on staging and UAT setup
	Engineer)	 Ensuring consistency across staging / production and Disaster recovery systems. Monitoring servers for hardware errors like hard disk, RAM, CPU failures / warnings and 	 Hardening of servers as per bank policy User administration, User access & activity review.
		notifying appropriate service providers and working on the same till closure.	 Infrastructure Capacity review & planning
		Monitoring LUN utilization and assist in capacity planning, storage systems and clusters.	Performance improvement and automation of jobs
11	Deputy Manager	 Manage logs, backups and tape inventory. 24 * 7 involvement over OS activities in a shift basis for better supervision and governance. 	 Above activities in all environments of application (production, DR, development and staging). Manage logs, backups and tape inventory.
11	(Middleware	 Installation, configuration and patching activities. 	 Manage logs, backups and tape inventory. Escalating hardware and system-level problems to AMC Vendors.
	Engineer)	 Monitor operating system utilization patterns and preparing reports. 	Working on the requests of development and support team on staging and UAT setup
		 Ensuring consistency across staging/production and Disaster recovery systems. Monitoring servers for hardware errors like hard disk, RAM, CPU failures/warnings and notifying 	 Hardening of servers as per bank policy User administration of all servers
		appropriate service providers and working on the same till closure.	 Derformance improvement and automation of jobs
		 Monitoring LUN utilization and assist in capacity planning, storage systems and clusters. 	Above activities in all environments of application (production, DR, development and staging).
12	Deputy Manager	 Maintenance and development activities across ETL, processing and reporting life cycle on Oracle Financial Services Analytical Application for Risk and Finance reporting and Analytics. 	 Data Mining OBIEE Repository Management and OFSAA Reporting, Validation, or results
	(Developer- OFSAA)	 Application for Nisk and Finance reporting and Analytics. Applicant must be proficient on Data management, handling big data volume and exposed to 	 System Enhancements and Change request management for delivering the new functionality
	/	best practices in data mining and Business Intelligence.	and requirements of RBI and departments
		 Candidate will be preferred with experience on OFSAA, Oracle Financials, SAS, SunGard products with implementation and maintenance experience at large Banks. 	 Ensuring compliance to BCBS-239 standards Hands on the module wise functionality /Process Run and reporting
		 Proficient in PL/SQL programming as per report requirements. 	 Responsible for closure of VA/PT and other audit observations.
		Proficient across ETL life cycle, maintenance and loading of Source Systems	
13	Deputy Manager (Informatica/ ETL	 Assist development teams to maintain all data sources and data storage options. Coordinate with application team and develop all ETL processes. 	Evaluate all functional requirements and map documents and perform troubleshoot on all
	Developer)	 Administer all requests and analyse issues and provide efficient resolution for same. 	 development processes. Design all test cases to provide support to all systems and perform unit tests.
		 Design all programs and systems and associate documentation for same. 	Data Modelling
44	Donuty Monogor	Monitor all production issues and inquiries and provide efficient resolution for same.	ETL Development and Testing Functions / Activities:
14	Deputy Manager (Treasury Support)	 Responsibilities: Assist Treasury Vertical Head in operations and resolution of day-to-day issues. 	Reduction in Number of issues.
	(To Introduce processes and system upgrades for robust and smooth day to day operations.	 Introduction of robust and automated solution to existing and new business problems.
		Implementation of wholistic solutions for New Business challenges and opportunities.	Increased TAT for new enhancements and rollouts.
		Augment L1 Support	 Ensure Compliance with Bank's IT-IS policy. Assist / lead in developing in house and innovative solutions.
15	Deputy Manager	Windows Server Administration.	Coordination with OEM for further support in case of issues.
	(Microsoft Active	Creation of Golden Image / Desktop Build.	Server management activities like installation, patch management, administration user
	Directory	Windows Patch Management.	management.
	Services)	 Integration of application with Single Sign On. Management of group policy deployment and implementation. 	 Coordination and follow-up with SPOCs, LHOs, GITC, CC Departments. Fixing IT related issues highlighted various audits.
		 Managing infrastructure & resources in the project. 	 Seamless conduct of IBCE / DR drills and maintenance of RTO.
		 Closure of Audit observations, VAPT, SOC Incidents, IEHRT Incidents 	Near zero downtime of application and related IT setup.
16.	Deputy Managar	Engaging with Vendors for entire project lifecycle which is developed/ deployed by Vendor team. Deliver Project/Program management in IT Products/Services from incention till closure	Manage relationships with the client and all stakeholders.
10.	Deputy Manager (DevOps)	 Deliver Project/Program management in IT Products/Services from inception till closure. Deliver complex technology solutions within a defined Software development lifecycle. 	 Manage relationships with the client and all stakeholders. Coordinate with internal resources and third parties/vendors for the flawless execution of
	x - P=/	 Work as Business Analyst in defining technical solution / architecture in BFSI domain. 	projects.
		 Work in a fast paced, cross-functional and multi departmental environment. 	Communicate with vendors, suppliers and executive management to ensure availability of infrastructure, technologies and support
		 Functional go-to person for multiple business partners. Build and lead high-performing agile teams, with focus on Business, Application, Data and 	 infrastructure, technologies and support. Define project scope and objectives, involving all relevant stakeholders and ensuring technical
		Technology Architecture.	feasibility.
		Contribute to IT planning, development of strategies/initiatives and product lifecycle/service crientation	Ensure projects are delivered on-time, within scope and within budget.
		 orientation. Determine current and future needs of IT eco-system. 	 Perform on-going analysis of projects and reports to relevant stakeholders. Create and maintain comprehensive project documentation.
		Perform periodic training on project management and project management related concepts on	 Perform risk management to minimize project risks.
		a periodic basis.	 Report and escalate to management as needed. Deliver products/services in alignment with business needs and objectives
		 Develop a detailed project plan to monitor and track progress. Measure project performance using appropriate tools and techniques. 	Deliver products/services in alignment with business needs and objectives.
17.	Deputy Manager	Roles:	Installation, configuration, hardening of application software as required by the Application
	(Middleware	• Installation, Administration, Configuration, Hardening, troubleshooting issues of Application and	owner.
	Administrator WebLogic)	 Web Servers and ensuring their Availability. Monitoring health of the hosted applications and application/web servers. 	 DR switchover and Failover activities Train the team in Web/APP Server administration.
	weblogic)	Responsibilities:	 Perform additional duties as determined by business needs and as directed by management.
		• Installation, Configuration, Patching, Hardening and upgradation of Application Servers Oracle,	Functions / Activities:
		WebLogic, Oracle HTTP Server etc.,	Patching, Hardening, Network Configuration of Web/APP Servers.
		 Day-to-day troubleshooting like (but not limited to) space issues, memory utilization, performance issues. 	 Co-ordinate with development team to resolve production issues. Manage and monitor the server's health and implement best security practices to secure the
		• Setup, maintain and build automation pipeline using Ansible tool for Configuration Management,	servers.

18.	Deputy Manager (System	 Automation of task's using UNIX Shell scripting/Windows Batch Scripting/Ansible/Puppet etc. as per the requirement from the application team. Provide Inputs/ Evidence for Security Review, Audit Observation and closure of Web/APP server related audit and security points. Setup/monitoring of Backup of Application log, Web Server, OS logs as desired by Application owners using Bank's provided Backup Solutions. Health Monitoring of App/Web Servers and integration with APM/Health Monitoring tools. Coordinating with Application owner, other Infrastructure Teams, Security and Risk teams to resolve the vulnerabilities. Roles: Installation, Administration, Configuration, Hardening, Troubleshooting issues of Red Hat Linux 	 Troubleshooting and debugging Application/Web Server issues and underlying Operating Systems issues. Coordinate with OHS/WebLogic/Microsoft Teams and Global Support Team for early resolution of issues. Installation, configuration of Health Monitoring tools for the App/Web Servers. Support Application Owners for DC/DR Movement. Setup and installation of containerized version of the APP/Webservers and assisting owners in containerizing the applications. Installation, configuration, hardening of application software on Linux OS as required by the Application owner.
	Administrator Linux)	 Operating Systems, Oracle Linux VMs or any other Linux Based Operating system. Monitor the Servers running Linux OS and ensuring Availability of the VMs. Monitoring health of the applications installed on Linux VMs. Responsibilities: Installation, Configuration, Patching and upgradation of Linux Operating System. Strong command line experience for day-to-day OS troubleshooting like but not limited to space issues, memory utilization, performance issue and Boot issues. Setup, maintain and build automation pipeline using Ansible tool for Configuration Management, Patching and Infrastructure management. Automation of task's using UNIX Shell scripting as per the requirement from the application team. Provide Inputs/Evidence for OS Review, Security Review, IS Audit Observation and closure of OS related audit and security points. Setup of Backup of Application log, OS logs as required by Bank. Health Monitoring of Linux VMs. 	 Train the team members in Linux administration Functions / Activities: Patching, Hardening, Network Configuration of Non-Windows Operating system Co-ordinate with development team and other Infrastructure Team members to resolve production issues. Manage and monitor the server's health and implement best security practices to secure the servers. Coordinating with Backup Solution team to ensure daily backup of logs and application data. Strong troubleshooting, debugging skills and knowledge of crond, systemd, journalctl for debugging the OS, Application issues. Coordinate with RHEL/OEL L3 Teams and Global Support Team for early resolution of issues. Installation, configuration of Health Monitoring tools on Linux VMs. Support Application Owners for DC/DR Movement. Setup of Docker/Podman etc. on Window VMs for containerized applications Installation, SCD and configuration of Application Servers like Tomcat, WebLogic etc. Sync File system between servers using tools like rsync etc.
19.	Assistant Manager (Java Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
20.	Assistant Manager (Full Stack Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
21.	Assistant Manager (.Net Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
22.	Assistant Manager (Angular Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
23.	Assistant Manager (Software Developer)	 Roles & Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. Communicate efficiently and purposefully with internal customers and business partners. 	 Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution, Conducting of Unit Testing, Integration Testing and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
24.	Assistant Manager (Endpoint Security Support)	 Endpoint Security Solution (ESS) Implementation ESS Reports Monitoring Managing Infrastructure & Resources in the Project. Closure of observations of Audit Reports within TAT. Server Management activities like Installation, Patch Management, Administration, User Management. 	 Monitoring of Updation of latest Antivirus signatures in whole SBI IT environment. Coordination and follow-up with SPOCs, LHOs, GITC, CC Departments. Closure of observations of Audit Reports within TAT. Seamless conduct of IBCE / DR drills and maintenance of RTO. Closure of VAPT observations, SOC Incidents, IEHRT Incidents. Procurement related to assigned projects, its implementation and maintenance.
25.	Assistant Manager (Developer - OFSAA)	 Maintenance and development activities across ETL, processing and reporting life cycle on Oracle Financial Services Analytical Application for Risk and Finance reporting and Analytics. Applicant must be proficient on Data management, handling big data volume and exposed to best practices in data mining and Business Intelligence. Proficient in PL/SQL programming as per report requirements. Proficient across ETL life cycle, maintenance and loading of Source Systems Data Mining 	 OBIEE Repository Management and OFSAA Reporting, Validation, or results System Enhancements and Change request management for delivering the new functionality and requirements of RBI and departments Ensuring compliance to BCBS-239 standards Hands on the module wise functionality /Process Run and reporting Responsible for closure of VA/PT and other audit observations.
26.	Assistant Manager (Microsoft Active Directory Services)	 Windows Server Administration. Creation of Golden Image / Desktop Build. Windows Patch Management. Integration of application with Single Sign On. Management of group policy deployment and implementation. Managing infrastructure & resources in the project. Closure of Audit observations, VAPT, SOC Incidents, IEHRT Incidents Engaging with Vendors for entire project lifecycle which is developed/ deployed by Vendor team. 	 Coordination with OEM for further support in case of issues. Server management activities like installation, patch management, administration user management. Coordination and follow-up with SPOCs, LHOs, GITC, CC Departments. Fixing IT related issues highlighted various audits. Seamless conduct of IBCE / DR drills and maintenance of RTO Near zero downtime of application and related IT setup

27.	Assistant Manager (IIB Developer)	 Development of IIB Webservices Maintenance and upgradation of already developed webservices/ Change implementation as per Banks requirement API Integration Data Integration and Workflow Design Documentation and training to other developers Build integration solutions (application, service, and library) Build a message model 	 Generate JavaScript client APIs from an existing integration service (high level) Build solutions with basic built-in nodes. Design and build transactional solutions with IBM Integration Bus Integrate with JCA Adapters (high level) Integrate with WebSphere Service Registry and Repository Integrate with Visual Studio Integrate with IBM Business Process Manager
28.	Assistant Manager (BMC/SANOVI Support)	 Managing the BMC Solution and create/ generate performance and capacity reports Development of dashboard in Co-ordination with BMC Tool such as Database availability dashboard, Web/App Server Availability, CPU and Memory Performance dashboard etc 	 Ability to review add/update monitoring procedures Learning and improvement in DR Automation tools such as Sanovi Automation of DC-DR Drill
29.	Assistant Manager (Android Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
30.	Assistant Manager (iOS Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
31.	Assistant Manager (PI/Sql Developer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
32.	Assistant Manager (Platform Engineer)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
33.	Assistant Manager (Devops Admin)	 Responsibilities: Application Development for various Business Demands using latest development technologies. Responsible for Coding, Implementation, Maintenance, Quality Assurance, Debugging etc. Technical Document preparation and review (HLD, LLD, Sequence Diagram, Process Flow Diagram etc) Database normalization design. Functions / Activities: Develop solutions designed to maximize Business Value. Able to rapidly acquire knowledge of a given domain. Effective in ensuring that deliverables are in conformance with system architecture and standards for development. 	 Communicate efficiently and purposefully with internal customers and business partners. Conducting Business Requirement Analysis. Preparation of detailed Solution Design. Coding of the proposed solution. Conducting of Unit Testing, Integration Testing, and closing the findings. Closing the findings of User Acceptance Testing and Information Security Testing. Deployment of the developed software / application. Handling the Production Bugs and providing support. Documentation. Continually learn and keep abreast with latest technologies. Perform additional duties as determined by business needs and as directed by management.
34.	Assistant VP (Technology Architect)	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. 	 Perform additional duties as determined by business needs and as directed by management. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals.
35.	Assistant VP (DevOps Architect)	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. 	 Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals.
36.	Assistant VP (API Architect)	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. 	 Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise.

Àrchite	tructure ect)	 Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility	 Lead other IT Architects to provide effective consulting on complex projects including RFP technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals. technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals. Create Secure IT Infrastructure Architecture and roadmap that result in strong business IT alignment, driving latest suitable technology adoption and usage of technology across the enterprise. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals. Reviewing infra implementations to ensure alignment against business/design goals, Disaster recovery and BCP. Design / Review Enterprise Infrastructure to meet industry best practices, Regulatory & security compliance and high-level performance. Reviewing changes to IT infrastructure (Compute / Storage / Network) and its impact analysis. Evaluating new Infrastructure technologies and advising Bank on its Pros/Cons Supporting security arc
38. Assista (Progr Manag	am ger)	 Managing large end-to-end projects, building stakeholder buy-in on project plan, timelines, commitments, changes, project completion and sign-off. Supporting Technology teams to manage proactive delivery, balancing scope, scheduling, Resource management, handling dependencies, people management, effective communication, risk, quality, and budgeting 	 Enforcing process discipline and improvements in areas of expertise, such as disciplined agile software delivery, production support processes, or continuous DevOps pipelines development Collaborating with the Technology teams and Product Owners to improve productivity through backlog management, effective use of maturity models, Project management methodologies (e.g., Scrum, Kanban etc.)
39. Assist. (Applic Archite	act)	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP 	 technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new technologies. Develop architectural solutions for new solutions / changes to existing applications and solutions to the bank from conceptualization through deployment. Understanding enterprise business requirements and mapping them into technical solutions, assist in the scope definition. Create high level and low-level design documents. Experience in UML design tools. Develop relevant technical SOPs for rollout. Define metrics to measure performance of applications. Create enterprise-wide architecture of applications ensuring reliability, scalability, manageability, and security compliance. Collaborate with key stakeholders in IT infra domain, IT-vendors and other architects to achieve enterprise business goals. Define and understand current state solutions and identify improvements, options & trade-offs to define target state solutions. Ensuring compliance to architecture principles and standards as per enterprise requirements. Develop POCs, case-studies and demo presentations for new growth areas based on market research.
40. Assist: (Secur Archite	rity	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP technical examplication of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new 	 technologies. Collaboration with security teams, business and technology partners and security agencies to ensure regulatory and security compliance as per enterprise requirements. Participate in architecture design discussions to drive secure development and implementation best practices and security compliance. Identify gaps in existing security architecture and to provide solutions. Contributing to the overall Operational Technology (OT) security program implementation, including network security design, asset management, vulnerability assessment, SIEM and authentication implementation support, and other technically complex activities as needed Serving as a key subject matter expert in the field of information and network security, TCP/IP based data communications. Maintaining a deep understanding of voice, video, and data network convergence in client enterprise network and storage and data network convergence in client data centers Serving as a subject matter expert in security & data communications and be responsible for the analysis and design of effective and secure network systems, infrastructure, and related technologies, while partnering with business units especially Information Security Research latest IT security standards & trends and provide guidance during design activities of new applications / change on existing applications on security risk R&D and understanding industry trends and what is and isn't applicable for the Bank Proactively recognizing when architectural decisions for their domain may have cross architectural impacts and work to identify best solution with other architects Leading projects and be accountable for meeting objectives including timelines and budgets Level 4 troubleshooting support to resolve critical security incidents and RCA. Engaging and influencing business and technical audiences, drawing out diverse viewpoints and driving to agreement usi
41. Assista Archite	ant VP (Data ect)	 Set up technical standards and governance structure for the enterprise. To Provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Setting up technical standards, formulation of Enterprise Architecture (EA) Governance Framework. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP technical evaluations for various business domain. 	 technologies. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals. The Enterprise Data Architect will be responsible for maturing and extending data management, data engineering, metadata management, Data warehouse, Data Lake and Data virtualization/fabric solutions across the organization. By combining a strong technical background with a solid understanding of market trends, the IT Enterprise Data Architect will be responsible for architecting, designing, and delivering projects and enhancements across the Enterprise Data Platform. Evaluate current state architecture and recommend and implement changes with a focus on modernization of Data integration (ETL, ELT, API/ESB) and Data Virtualization solutions. Combine business needs, vendor roadmaps and technology trends to develop Enterprise Data Management platforms and product roadmaps and future state architecture diagrams for the bank based on their roadmap. Mitigate issues related to data quality Provide technical and architectural guidance to projects, teams, and service providers, ensuring that new initiatives enable effective and scalable data storage, data engineering and data analysis capabilities Participate in architectural review boards, evaluations of data and analytics solutions/COTS products, and technologies Research, recommend and pilot tools and process changes to drive quality and efficiency across the solution development lifecycle

		 Lead multifunctional teams in successful application of methodologies and architecture modelling tools. As an architect the person would be responsible for suggestion and implementation of new 	 Act as a thought leader on industry trends, emerging data management capabilities (such as enterprise data lake) and technologies (cloud platforms) and potential use for various existing and potential Customers.
42.	Assistant VP (Cloud Architect) Assistant VP (Integration	 Acts as the single point of contact (SPOC) between D&T and the business for all things related to cloud architecture. Champion and serve as the lead cloud architect for cloud transformation programs involving AWS and Azure platforms Lead architecture assessment of applications and enable cloud readiness and migration Work with cloud engineering teams to deliver global cloud services including container orchestration, IaC patterns, cloud service catalog etc. Lead strategic initiatives around Immutable Infrastructure, Serverless and DevSecOps Platformization Develop and build modern cloud platform services across multi cloud platforms including Container management Understanding of cloud security principles to be incorporated in architectural design and documentations Ability to evaluate current hosting maturity for the client environment Good understanding on cloud native services for cloud native development Be aware and evaluate new cloud native/ hybrid hosting solution available in market and develop PoV / use cases for client s reference Ability to work with 3rd party to implement hosting solutions Develop teams internally through cloud initiatives To provide technology architecture expertise and guidance across multiple business divisions & technology domains. Assist business strategy and accordingly drive technology strategy from an architecture perspective. Driving technology strategy from an architecture perspective, across a portfolio of applications in the Bank, for resource optimization and Risk mitigation. Translating business requirements into specific system, application or process designs, including working with business personnel and executives to identify functional requirements. Create an enterprise-wide integration architecture that ensures that all enterprise systems are seamlessly integr	 Define/ maintain Target Architectures in Roadmaps. Lead and/or assist efforts to scope and architect major change programs, leading strategic options analysis & proposing end-to-end solutions & highlighting trade-offs. Review ongoing designs of major programs to identify strategic opportunities and resolve design issues during delivery. Identify key technology enablers to optimize IT investment. Develop highly complex solutions that exemplifies quality optimization regarding reliability, availability, scalability, manageability, flexibility, usability/ reusability, and high performance. Deliver Architecture solutions in a Banking environment at the highest-level technical expertise. Lead other IT Architects to provide effective consulting on complex projects including RFP technical evaluations for various business domain. Lead multifunctional teams in successful application of methodologies and architecture modelling tools. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise business goals. As an architect the person would be responsible for suggestion and implementation of new technologies. Designing and deploying dynamically scalable, available, fault-tolerant, and reliable applications on the Cloud Selecting appropriate Cloud services to design and deploy an application based on given requirements Migrating complex, multi-tier applications on Cloud Platforms Designing and deploying enterprise-wide scalable operations on Cloud Platforms Implementing cost-control strategies Understanding of application lifecycle management Understanding of application lifecycle management Develop and establish relevant integration metrics (KPIs / SLAs) to drive results.
	Architect)	 Analyze applications, exchange-points, data formats, connectivity requirements, technology environment and specifications to design a secure integration solution framework. Define and understand current state integration solutions and identify improvements and gaps to define target solution. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve 	 Lead the development and maintenance of integration framework and related artefacts. Ensure integration architecture principles are consistently applied and adopted within the enterprise. Integration of enterprise application modules / components with 3rd party / COTS / Cloud
44.	Assistant VP (Performance Architect)	 Collaborate with key stakeholders in Tr infra domain, in-vehicles, and other architects to achieve low-level design/configuration to improve performance metrics with minimal or no impact to existing systems. Collaborate with key stakeholders in IT infra domain, IT-vendors, and other architects to achieve enterprise performance goals and reduce performance anomalies. Tuning of application, Database, configurations of the servers/tools to improve the overall performance. Placement/migration of application and infra components to improve performance without compromising security compliance 	 solutions/internal downstream applications. Analyze monitoring and log data to arrive at proper infra sizing and capacity planning. Create framework and use automation to measure, validate and improve system/application performance. Participation in critical incident management and preparation of RCA. Tuning of Cloud native deployments with focus on Cost Optimization. Participate in architecture reviews to identify potential issues, bottlenecks and provide early guidance. Analyzing and taking corrective steps on bottlenecks identified by the various performance testing tools.
45.	Senior Special Executive (Middleware Architect)	 Lead development, implementation, and maintenance of ESB. Create Service Specifications describing the input and output interfaces for the service, as well as its security, editing and interface protocol requirements. Lead development activities implementing solutions including developer setup, deployment, build and release, packaging and configuring the environment. Design and develop different types of services and exposing them for all business domains in the SOA environment. 	 Create SOA Design standards and best practices for object naming, design & deployments, data & content integration, and production output using various channels. Design services to wrap Third Party software, exposing functionality to store / retrieve / archive / manage information in a Service Oriented Architecture (SOA) environment. Write and document enterprise level SOA standards, best practices, and patterns. Model services describing the service layers in the desired business domain. Help establish the build and release process around integration and SOA solutions.
46.	Senior Executive (API Designer)	 Design and develop highly customised APIs using IIB platform adhering to the latest API standards and consistency. Translating the business requirement to develop high level design, integration flows. Creating low level design from the requirement and HLD. Timely delivery of all API designs and functionalities. 	 Reviewing of the design, flow, code and unit testing. Implement laid down security measures and guidelines in the API design, considering the performance and security in view. Perform unit testing and cross functional integration testing. Mentoring team for delivering of high performance and quality API.
47.	Senior Executive (API Developer)	 Design and develop highly customised APIs using IIB platform adhering to the latest API standards and consistency. Translating the business requirement to develop high level design, integration flows. Creating low level design from the requirement and HLD. Timely delivery of all API designs and functionalities. 	 Reviewing of the design, flow, code, and unit testing. Implement laid down security measures and guidelines in the API design, considering the performance and security in view. Perform unit testing and cross functional integration testing. Mentoring team for delivering of high performance and quality API.
48.	Senior Executive (API Performance Tester)	 Understand the functional and non-functional requirements like Load Testing, Compliance Testing, Stress Testing, Security Testing etc from BRD and design specifications. Analyse critical business scenarios and requirements. Develop test strategy, test suites, test cases, test data, and scripts for performance and regression testing. 	 Design workload model and execute test cases. Monitor and analyse the test results and provide recommendations. Draft test report and apprise all the stakeholders. Carry out continuous test process improvement with the help of metrics.
49.	Senior Executive (Dev-Sec-Ops- Developer)	 Responsible for software development, recognizing the security threats eg. DDOS attack, security vulnerabilities, security patches etc., and configuring the network infrastructure. Conducting risk assessment and implementing techniques and latest security best practices. Apply cybersecurity measures and guidelines. Recognizes the latest vulnerabilities with the code analysis and its resolution. To mentor and train the team with best practices, security guidelines. 	 Responsible for development cycles in integration/continuous deployment mode, they can full fill different missions. To identify, assess and investigate threats and vulnerabilities. Should adopt the Agile methodology to keep up with the CI/CD approach. Responsible for the configuration and optimization of infrastructure components.
50.	Senior Executive (API Security Architect)	 Develop a complete understanding of a Bank's technology and information systems. Design, build, implement and support enterprise-class security systems. Align Bank's security strategy and infrastructure with overall business and technology strategy. Identify and communicate current and emerging security threats. Design security architecture elements to mitigate threats as they emerge. Plan, research, and design robust security architectures for any IT project. Perform or supervise vulnerability testing, risk analyses and security assessments. Create solutions that balance business requirements with information and cybersecurity requirements. Identify security design gaps in existing and proposed architectures and recommend changes or 	 enhancements. Review and approve installation of firewall, VPN, routers, IDS scanning technologies & servers. Test security systems to ensure they behave as expected. Provide supervision and guidance to a development team. Define, implement and maintain corporate security policies and procedures. Train users in implementation or conversion of systems. Respond immediately to security-related incidents and provide thorough remedial solutions and analysis. Regularly communicate vital information, security needs and priorities to upper management.
51.	Senior Executive (Microsoft Active Directory Services)	 Windows Server Administration. Creation of Golden Image / Desktop Build. Windows Patch Management. Integration of application with Single Sign On. Management of group policy deployment and implementation. Managing infrastructure & resources in the project. Closure of Audit observations, VAPT, SOC Incidents, IEHRT Incidents Engaging with Vendors for entire project lifecycle which is developed/ deployed by Vendor team. 	 Coordination with OEM for further support in case of issues. Server management activities like installation, patch management, administration user management. Coordination and follow-up with SPOCs, LHOs, GITC, CC Departments. Fixing IT related issues highlighted various audits Seamless conduct of IBCE / DR drills and maintenance of RTO. Near zero downtime of application and related IT setup.
52.	Senior Executive (Endpoint Security Support)	 Endpoint Security Solution (ESS) Implementation ESS Reports Monitoring Managing Infrastructure & Resources in the Project. Closure of observations of Audit Reports within TAT. Server Management activities like Installation, Patch Management, Administration, User Management. 	 Monitoring of updation of latest Antivirus signatures in whole SBI IT environment. Coordination and follow-up with SPOCs, LHOs, GITC, CC Departments. Closure of observations of Audit Reports within TAT. Seamless conduct of IBCE / DR drills and maintenance of RTO. Closure of VAPT observations, SOC Incidents, IEHRT Incidents. Procurement related to assigned projects, its implementation and maintenance.
Rema	rks: KRA's: KRAs shal	Il be assigned on joining. Job Profile mentioned above are illustrative. Role/Jobs in addition to the above	nentioned may be assigned by the Bank from time to time for the above posts.

(D) Remuneration:									
	Name	Grade	Scale of Pay / Proposed CTC Range
